

Experience

Frontend Tech Lead SingularCover. *Present*

February 2021 -

I currently working as a Frontend Team Lead, first thing I did was to break the monolith, creating our own component catalog and creating our own architecture library, this allow us to only use the react project for the UI, for this project we decide to use react context because our we need to access the data in specific point even though the components are unmounted. The architecture library allow us to communicated with differents api's like Contentful and Phrase.

Tech Lead and Senior Application Architect Atmira Espacio de Consultoria *2021*

May 2018 - February

Frontend Team Lead for the new Online Banking of AndBank, this a new project with five developers where we have to create a new frontend using Reactjs, Redux with SAGA, TypeScript, the React Testing Library and Material-UI.

Also I was Working as Frontend Team Lead of Sirec platform with a team of 12 developers; Sirec is a multilanguage debt recovery software own by Atmira. In this project we had to reengineering the frontend using the micro-frontends concept , where every micro-frontends is created with Angular 9 as main framework.

I was part of the Silk team (CaixaBank) to develop the new frontend architecture for CaixaBank. This new architecture apply new concepts like micro frontends and new technologies like web components using Stenciljs. Our duty was to design, architecture and develop the core modules like, communication, authentication, internationalization, etc. All of this to help developers to migrate current CaixaBank apps to new micro frontends using react and web components

Frontend Developer Userzoom *March 2018*

February 2017 -

I was working in the new analytics version of Userzoom with a team of 4 members; this is a new web application made from scratch. I was a little involve in the backend using Scala and Play Framework, with this technologies we made the analytics API, but my main duties was the development of the new analytics UI using the React, Redux ecosystem. Also, I was in charge of the development of a Tableau Web Data Connector, with this web application, the user can handle the data in a different way like the analytics interface allow them.

Education

Computer Science Engineer - Universidad Alejandro de Humboldt,
Caracas, Venezuela

Computer Science Superior Technician - Instituto Universitario Jesús
Obrero, Caracas, Venezuela

Skills

React
Redux
Redux Saga
Stenciljs
WebComponents
VanillaJS
NodeJS
Ruby on Rails
MS SQL
JQUERY
MS Dexterity
GIT
HAML
CoffeScript
MongoDB
Postgresql
Cassandra
REDIS
SCRUM
GCCloud
